

This report evaluates the academic performance of Mississippi public school students instructed by graduates of Mississippi University for Women's (MUW) traditional and alternate-route educator preparation programs. It presents detailed student outcome data from the Mississippi Academic Assessment Program (MAAP) for grades 3–8, as well as end-of-course assessments in Algebra I, U.S. History, Biology I, and English II. These results are compared to statewide averages and to the performance of students taught by graduates of other Educator Preparation Programs (EPPs) across Mississippi.

The findings are derived from the 2025 Impact Report Card, a collaborative effort between Mississippi's higher education institutions and The National Strategic Planning and Analysis Research Center (NSPARC) at Mississippi State University. These annual reports serve as critical benchmarks for evaluating the effectiveness of teacher education and educational leadership programs statewide. Utilizing de-identified data from the state data clearinghouse, this report ensures accuracy and depth in its analysis. The findings contribute to CAEP's annual reporting measures, reflecting data from the 2023-2024 K-12 testing period. The two-year reporting lag allows for thorough evaluation, ensuring a comprehensive and precise assessment of educational outcomes.

Key findings indicate that MUW's initial program completers, especially the 2021-2022 cohort, demonstrated strong performance, with proficiency or advanced rates at or above those of comparable groups in several subject areas. In cases where MUW completers had lower scores, these instances often involved a small number of tested students (or completers), making it difficult to establish trends without additional context. A larger cohort of completers provides a more reliable representation of overall performance.
