YouTube Android Video Upload

The following fact sheet will guide you through how to upload a video to your YouTube channel with your Android device. You **MUST** have a YouTube channel to begin with.

1. Make sure YouTube is installed on your Android device first of all. Then open your camera and choose the video recorder option.
2. Record your video or choose the existing video that you'd like to upload to YouTube.
3. Click the YouTube link at the top right corner of the photo/video viewer.
4. Either sign in with the existing login for YouTube or use another account. Use your Myapps Google account provided by The W.
5. Provide a title and set your privacy options for your video. Then click the Upload button at the top right.
6. You will see your video upload, process, and then notify you when complete.
