How is it spread?

- Through the air by coughing and sneezing
- Close personal contact, such as touching or shaking hands
- Touching an object or surface with the virus on it, then touching your mouth, nose, or eyes

What are the symptoms?

- Fever
- Cough
- Shortness of Breath

Symptoms may show up 2-14 days after exposure

How is it prevented?

Similar to prevention of other respiratory illnesses, including the flu:

1. Wash hands often
2. Avoid touching eyes, nose, or mouth
3. Clean surfaces and objects people frequently touch
4. Stay home and avoid contact with others
5. Avoid crowded places and limit activities in public
6. Keep your distance from others (about 6 feet)
