## Meet the Student Success Center

The Student Success Center offers a wide variety of resources to support your student while at The W. We are excited to offer this newsletter to the parents of W students as a way to keep you informed and up-to-date on resources available to students.

### Orientation

Orientation is designed to help all new students get acclimated to campus, learn more about their major and prepare them to be successful in college.

[Orientation Info](#)

[Disability Accommodations](#)

Our goal is to ensure that students with disabilities have an equal opportunity to learn and demonstrate their knowledge. If students had a 504 plan or IEP in high school, it is likely they will qualify for an accommodation plan. However, they need to self-identify by completing our intake form.

[Learn more about Accessibility](#)

## Intermediate Development

Not all students enter college fully prepared for every subject. The Student Success Center offers intermediate classes in math, reading, writing, and study skills to give those students the necessary skills and background to thrive in their future classes. Students in these classes are part of the Engage learning community that supports and celebrates their accomplishments.

## Transfer Student Initiative

[Did you know the The W ranks #1 in the country as a destination for transfer students?](#) They can participate in a special orientation designed just for them, our transfer advisory board, and have some fun with transfer celebration week. We also offer pre-advising to help get the most transfer credit possible.

## Academic Support

The Student Success Center has two main components to support your student academically. The first is tutoring from a Peer Mentor. Peer mentors can help in subjects ranging from Statistics to Biology.

Meet the Peer Mentors

If a Peer Mentor is not available for your students' subject, they have access to 24/7 online tutoring through their Canvas course.
